

Seatex COVID-19 Update 04/03/2020

During this unprecedented time, Seatex is continuing to work diligently to fill your chemical needs. We understand that due to the current changing environment having a trusted partner is more important than ever. The Fort Bend Office of Emergency Management identified Seatex as an essential business allowing us to continue to meet the needs of our clients within the Agronomics, Energy, Industrial, and Cleaning industries while ensuring the well-being of employees, partners, and community.

Business Continuity

Many industries nationwide have been affected by COVID-19. We understand that some of our partners have had to decrease production or temporarily close their doors. If this is the case, please notify your account representative and know we will continue to be here for you when your doors reopen.

Companies across the world continue to experience an increase in demand for certain chemicals. To allow for appropriate order processing time and assure availability, please place all orders as far in advance as possible. Rest assured we will do our best to deliver your products in a timely manner.

Sanitizers

Seatex continues to fight against COVID-19 by producing high quality sanitizers and disinfectants to keep your teams and communities safe. We are helping our local communities by providing employment to those displaced due to COVID 19. These additional employees will enable Seatex to increase productivity and the supply chain to better support those in need.

We have 75% Isopropyl Alcohol and 80% Ethanol Alcohol Hand Sanitizer as per Food and Drug Administration (FDA) and World Health Organization (WHO) recommendations available in the size you need: 4/1-gallon, 5-gallon, 55-gallon and IBC's. Seatex's Hand Sanitizer is an effective means of killing germs and keeping your employees protected so that your business can continue to serve customers at this crucial time. If interested, call our VP of Commercial Sales, Scott Childers directly: 281.889.7792 or email schilders@seatexcorp.com.

Health and Safety

Seatex continues to take all possible precautions recommended by the Centers for Disease Control and Prevention (CDC) and World Health Organization (WHO) to assure the safety of our employees and delivery of products to our partners. We continue to add measures to ensure the health and safety of our team members and partners including; taking extra precautions for anyone entering the facility, additional PPE, practice good social distancing, continual awareness of the status and well-being of all employees, and the ability for select team members to work remotely.

It's clear, the only way to get through this and win the fight against COVID-19 is for us all to work together. Together we will conquer COVID 19 and come back better, stronger and more united than ever before.

Kelly Aimes, President/CEO
